

# Alexandre Carrara

R&D engineer in geophysics and computational fluid dynamics

## Highlights:

- ▶ Motivated numerical modeling engineer with a strong experience in geophysics and computational fluid dynamics
- ▶ Expert in developing, deploying, and using numerical tools and mathematical models of physical processes to tackle challenges in research and development
- ▶ Excellent skills in scientific communication and enthusiastic team worker
- ▶ Fast learner and eager to develop new skills

## Professional experiences:

11/22 – present	<b>Research Associate, University of Clermont-Auvergne, France</b> <ul style="list-style-type: none"><li>▶ Perform numerical simulations employing computational fluid dynamics and the discrete element method to study the rheology of geomaterials</li><li>▶ Design and build laboratory experiments to validate new developments in numerical models</li></ul>
11/20 – 11/22	<b>Research Associate, University of Washington, Seattle, WA, USA</b> <ul style="list-style-type: none"><li>▶ Develop and test new numerical models to simulate complex multiphase flows using computational fluid dynamics and the discrete element method</li><li>▶ Perform numerical simulations using computational fluid dynamics to study the impact of fluid flow on structures</li></ul>
01/20 – 03/20	<b>Invited researcher, University of the Andes, Bogota, Colombia</b> <ul style="list-style-type: none"><li>▶ Perform numerical simulations of the propagation of pressure waves in fluids using computational fluid dynamics</li></ul>
10/16 – 12/19	<b>Graduate research assistant, University of Grenoble, France</b> <ul style="list-style-type: none"><li>▶ Develop numerical simulations using computational fluid dynamics and the discrete element method to study the dynamics of magma chambers</li><li>▶ Teach mathematics, programming, and numerical modeling to undergraduate students</li></ul>
02/16 – 06-16	<b>Research intern, Institute of Earth Sciences, Chambéry, France</b> <ul style="list-style-type: none"><li>▶ Process satellite radar images to measure the deformation of Earth's surface</li><li>▶ Develop a new method to measure ground deformation on lava flows using satellite radar images</li></ul>
04/15 – 06/15	<b>Research intern, Institute of Earth Sciences, Chambéry, France</b> <ul style="list-style-type: none"><li>▶ Development of a numerical model to predict the path of magma in the Earth's crust</li></ul>
Summers 12-14	<b>Bike rental and repair, OGC Cylcand, Ile de Ré, France</b> <ul style="list-style-type: none"><li>▶ Rent/repair bikes and deliver customer services</li></ul>

## Education

- 2019 **Ph.D. in Geophysics, University of Grenoble, France**  
**Specialization:** Numerical modeling, Fluid dynamics, Physics, Volcanology
- 2016 **MSc in Geophysics, University of Grenoble, France**  
**Specialization:** Physics, Mathematics, Seismology, Rock Mechanics
- 2014 **Bachelor's degree in Earth Sciences, University of Aix-Marseille, France**  
**Specialization:** Geology, Geophysics, Physics, Chemistry

## Personal information

☎ : +33 6 29 63 03 66

📍 : 3 rue nouvelle de montjuzet  
63100 Clermont-Ferrand, France

## Skills

### Programming languages:

- ▶ Python
- ▶ Fortran
- ▶ Matlab
- ▶ C
- ▶ HTML
- ▶ MPI

### Softwares:

- ▶ MFIX
- ▶ FreeCAD
- ▶ GMSH
- ▶ Paraview
- ▶ COMSOL
- ▶ ImageJ
- ▶ Maxima
- ▶ Qgis

### Numerical modeling:

- ▶ Finite element
- ▶ Finite volume
- ▶ Finite difference
- ▶ Discrete element

### Others:

- ▶ Communication
- ▶ Teamwork
- ▶ Problem-solving

## Languages

**French** (Mother tongue)

**English** (Full professional proficiency)

**Spanish** (Elementary proficiency)
